Abstract

Ando was a young student who just moved from his village to Semarang. It was less than one day before he got hospitalized because of his stomachache. On the hospital, he met Hera who came to represent the Pelita Abadi Academy—Ando's school, and also as the Student Council of the academy. In their very first met, Ando did not know how to communicate with someone, as it was quite difficult for him to make relationship with people around him. So, he avoided to make conversation with Hera.

Ando who decided to leave his Grandma on the village and study on Semarang finally realized the reason of why he leaved the village. To reach the ambition of life, Ando knew that there should something changed from him, or he could not develop himself. Later on, he started to open up his mind to the society around him in order to reach his ambition of life.
